Data Backup

Services

You depend on your technology to get work done – and your data is essentially your company currency. When you lose data, you lose money – from customer and employee information to financial records, you simply cannot afford to lose your data. When disaster strikes and renders your systems unusable, how are you going to continue working? The answer is simple: you won't.

Haxxess offers backup and disaster recovery – the best way to make sure you're never left unable to operate. Call 705-222-TECH (8324) or send us an email to info@haxxess.com for more information.

Whether a flood, severe storm, power outage, or cyber attack happens, you need access to your data and systems.

If you're unable to access your data and systems, you're left to:

- Pay employees to sit idly and be unproductive
- Turn business opportunities away
- Lose customer trust and confidence

How does our backup and disaster recovery help you stay operational, even when disaster strikes?

• **Keeping your data, applications, and user settings backed up in our secure down town Sudbury cloud data center for recoverability.**

• **Testing and monitoring backups to ensure they're always working, and if failure occurs, resolving the issue.**

• **Creating a disaster recovery plan that outlines step-by-step procedures to ensure a quick recovery.**

Your data is constantly at risk – from hackers to employee mistakes to natural disasters, you simply can't afford to neglect having a proper backup and disaster recovery plan in place.

Stay prepared for the inevitable with our backup and disaster recovery planning.

Contact Haxxess at 705-222-TECH (8324) or send us an email to info@haxxess.com before it's too late.
